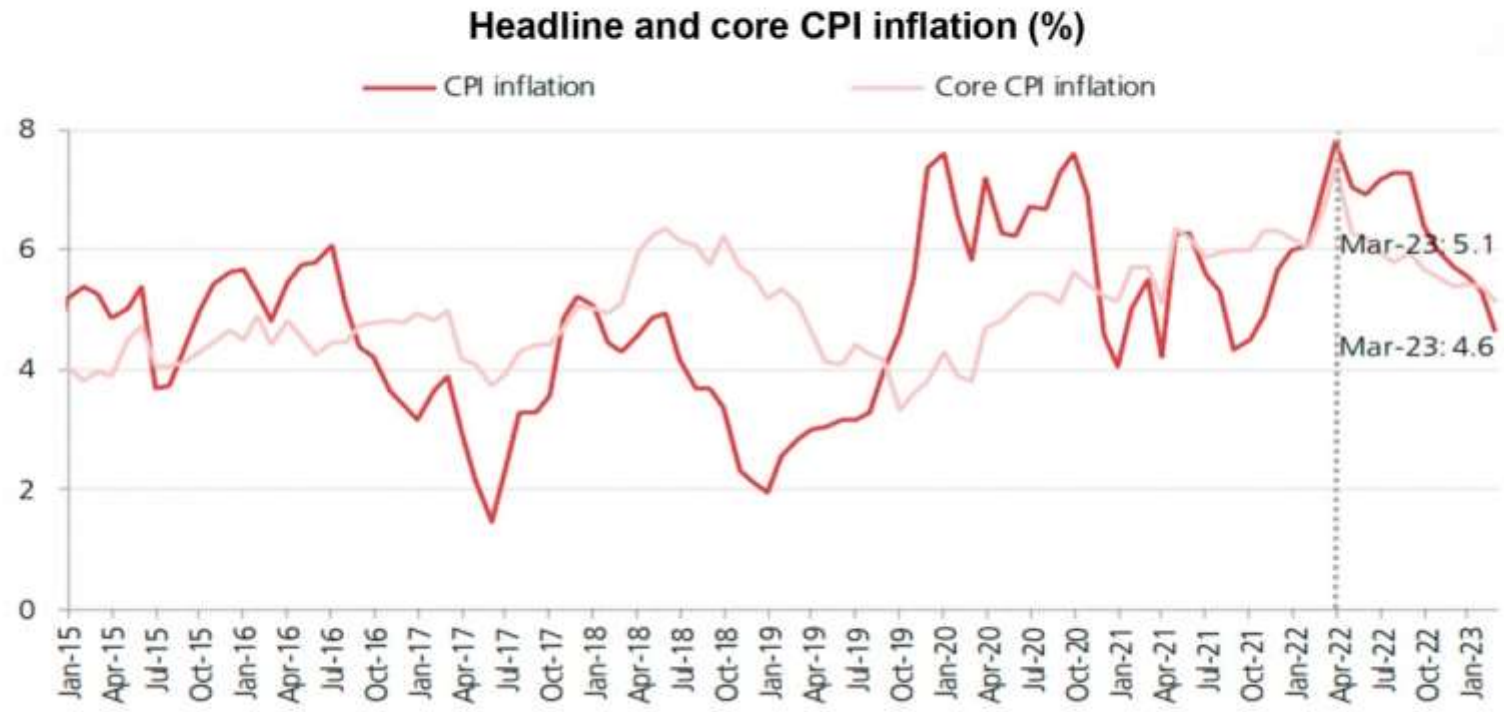
Subject to oil prices



Two extremes on Oil

Citi Warns Oil May Collapse to $65 by the Year-End on Recession

Serene Cheong

Published On 12:07 PM IST, 05 Jul 2022
Last Updated On 12:21 PM IST, 05 Jul 2022

Save

(Bloomberg) -- Crude oil could collapse to $65 a barrel by the end of this year and slump to $45 by end-2023 if a demand-crippling recession hits, Citigroup Inc. has warned.

That outlook is based on an absence of any intervention by OPEC+ producers and a decline in oil investments, analysts including Francesco Martoccia and Ed Morse said in a report. Brent, the global crude benchmark, last traded near $113 a barrel.

JPMorgan Sees 'Stratospheric' $380 Oil On Worst-Case Russian Cut

Joe Carroll

Published On 10:43 AM IST, 02 Jul 2022
Last Updated On 10:44 AM IST, 02 Jul 2022

Save

(Bloomberg) -- Global oil prices could reach a "stratospheric" $380 a barrel if US and European penalties prompt Russia to inflict retaliatory crude-output cuts, JPMorgan Chase & Co. analysts warned.

Inflation - Conclusion

India's rising share in MSCI EM to help flows

Indian economy and equity market have outperformed other EM nations, leading to a steady rise in its share in the MSCI EM index. This will help in sustained FII flows into equity markets in the coming years.

Rise in India's share in MSCI EM Index

Country	FY20	FY21	FY22	Now
China	36.1	35.5	27.5	26.9
India	7.7	9.6	12.8	16.2
Taiwan	12.1	13.7	15.5	13.5
S. Korea	11.7	13.3	12.3	11.9
Brazil	4.8	4.5	5.7	6.4
Other Nations	14.9	14.3	15.6	25.0

Source: Morgan Stanley Research

Recession - Conclusion

Generally, Recession emerges whenever Interest rate rise & demand slows down which leads to rise in unemployment as corporates slow their capacity n capex plans.

Central bank are then forced to cut rates to support growth & spur demand. Which leads monetary easing policies & finally recession fear recedes.

Infact, US Recession fear is good for India as FII money will be forced to move out from US and look for investment opportunity in EM like India/ China/ Brazil/ Indonesia

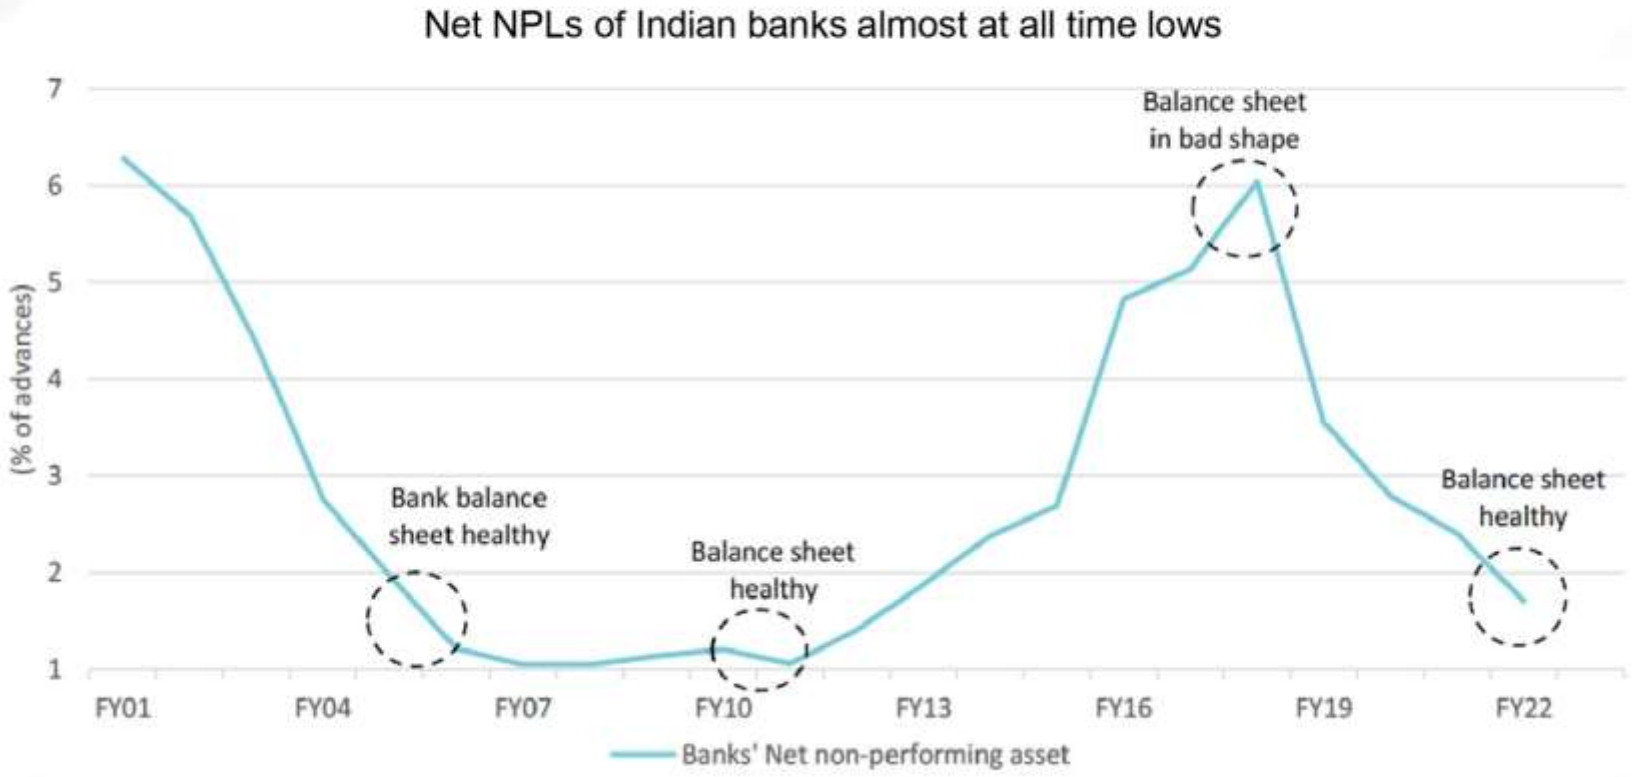
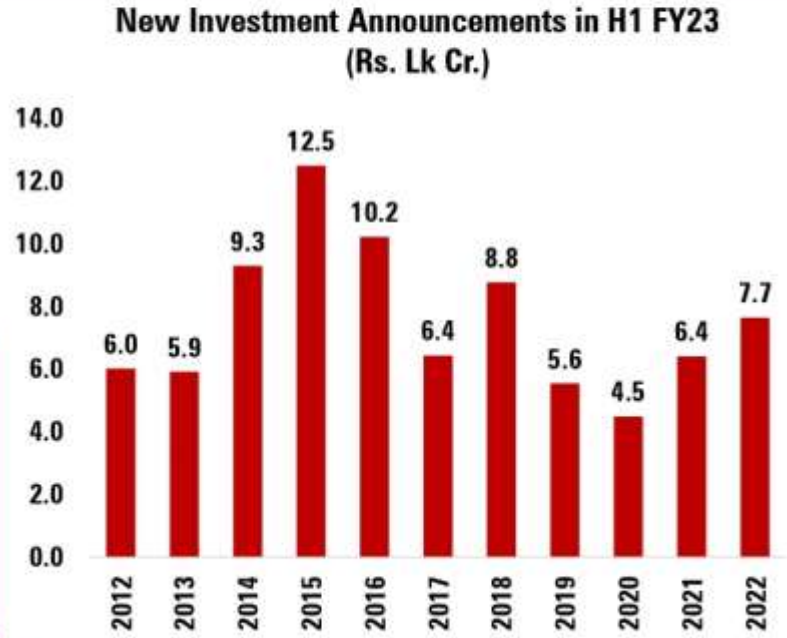
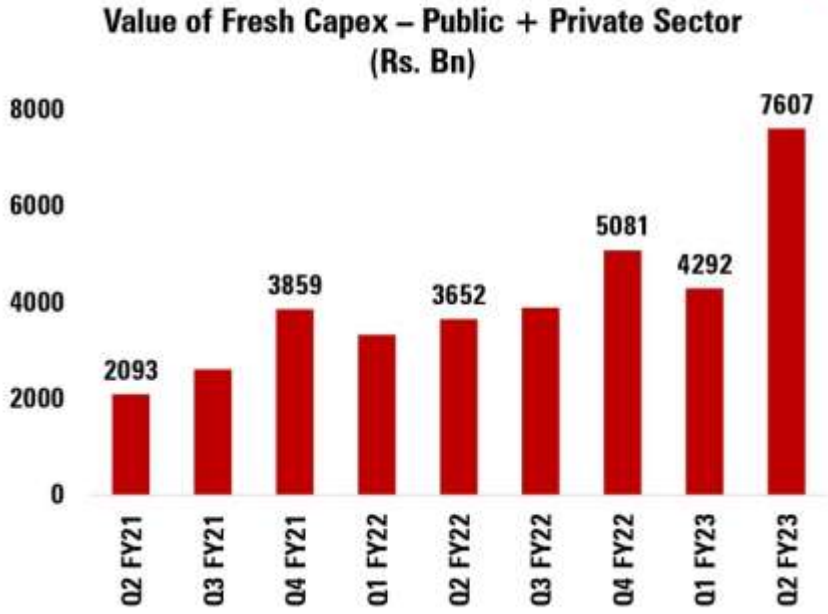
Bank Balance Sheets are Healthy



Domestic Tailwinds – Pick-up in Investment Cycle

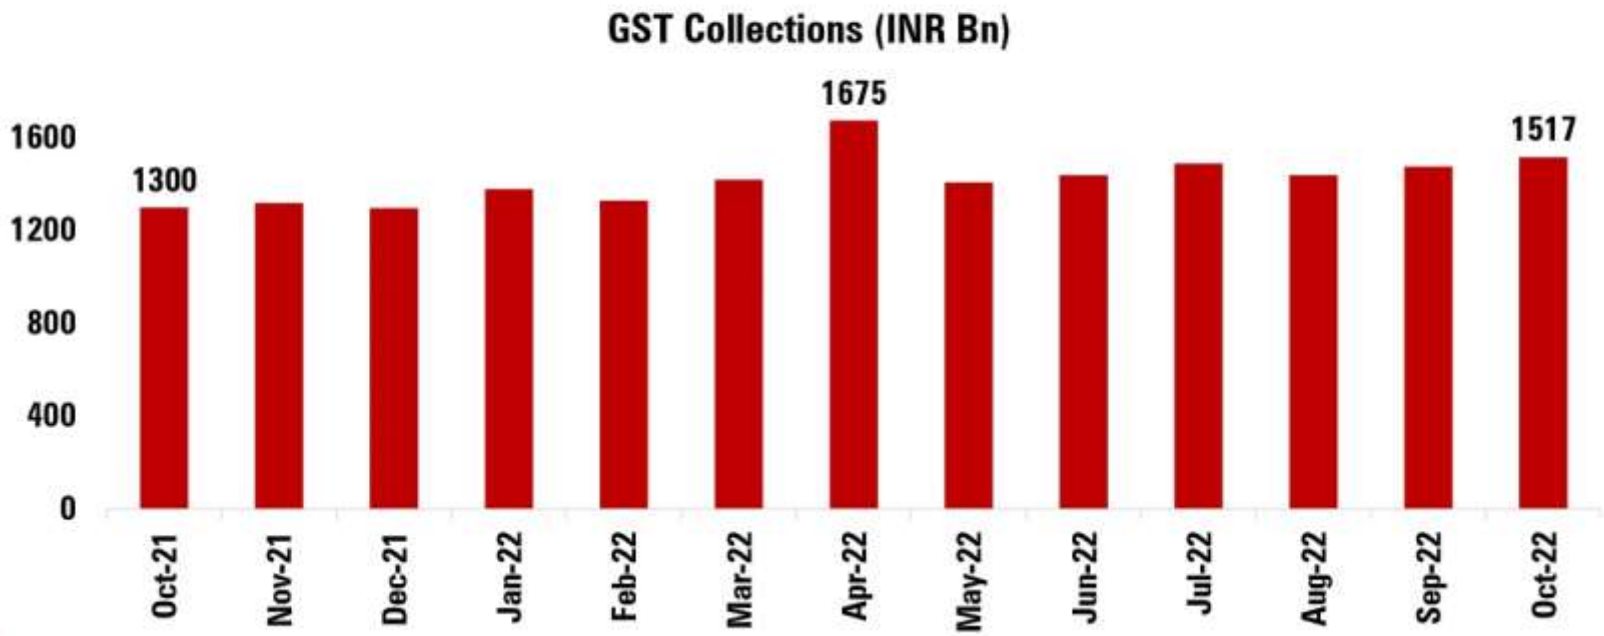
New investment announcements made by non Govt. companies in H1 FY23 have risen. Fresh capex investments too have risen which augurs well for Investment Cycle





Buoyant Tax Collections

Oct 2022 recorded second highest GST collection ever with, next only to the collection in Apr 2022. This not only helps the Govt. in capex but also helps manage fiscal deficit



Investing during bad time has been rewarding

Summary & Outlook

- Fundamentals of Indian economy appear relatively more stable than Developed economies
- However, there are few headwinds in near term that may affect Indian economy
- Those include appreciating USD against INR due to rate hikes by US Fed, India's rising external sector risk and inexpensive valuations
- Hence, continue to remain constructive on equities over long term and expect volatility in near term
- Given positive growth prospects of Indian economy, we believe sectors like Banking, Infrastructure & Manufacturing, Auto, Transportation & Logistics may do well.
- Pharma can be looked at from defensive consideration point of view
- We continue to recommend schemes which have the flexibility to manoeuvre across different Asset classes, Marketcap & Themes to mitigate expected volatility in near term

USD – US Dollar, INR – Indian Rupee

Return on Equity

ROE is gradually improving

Valuations

Valuations continue to remain on the higher side as a result of rising optimism around Indian economy amidst global turmoil
